PROFESSIONAL SUMMARY

Aspiring Python Developer with a Bachelor's degree in Economics with Foreign Trade and hands-on training in Data Analytics. Built TenderHub, a full-stack e-tender management platform using Python, Django, and MySQL, implementing 8 core workflows including tender, bid, contract, and payment processing with role-based access for buyers, suppliers, and administrators. Comfortable working with HTML, CSS, Bootstrap, and jQuery on the front end, and MySQL for backend data handling. Strong analytical and problem-solving skills, with additional experience in SQL and Power BI. Currently pursuing a Master's degree in Economics through IGNOU University, seeking a Junior Python Developer role to grow as a software developer.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Web Framework: Django
- Front-End: HTML, CSS, Bootstrap, jQuery
- Databases: MySQL, MongoDB
- Version Control & Tools: GitHub, VS Code
- Additional: Microsoft Excel, Power BI (Data Analysis & Visualization)

PROJECTS

TenderHub – E-Tender Management Platform | *Python, Django, MySQL, Bootstrap, jQuery*

- Developed a full-stack e-tender management platform in Django supporting buyers, suppliers, and administrators.
- Implemented 8 core workflows: tender, bid, contract, product, order, payment, notification, and reporting.
- Designed MySQL-backed data models and role-based access logic for secure, multi-user functionality.
- Built reporting and dashboard features within the platform using Django views and templates.
- Used Bootstrap and jQuery to build a responsive, functional front end.

Retail Sales & Profitability Analysis – Power BI | *Excel, Power BI*

- Collected and analyzed retail sales and profitability data to identify trends and patterns using Excel and Power BI.
- Built an interactive Power BI dashboard visualizing key business metrics and performance breakdowns.
